

Home Infusion Program – Getting Your Infusion or Injection Therapy

As a patient receiving one of the drugs listed below at a hospital, you are eligible for a new program that makes it easier to get your infusions or injections. With our home infusion program, you can now receive your infusions or injections in the comfort of your own home, medical offices,³ or at an infusion clinic located in Ontario and San Diego.

Benefits of our home infusion program include:

- ✓ **Safety.** Infusions are performed by skilled nurses who are trained to administer medications safely, and monitor and treat potential reactions.
- ✓ **Convenience.** Infusions can be scheduled according to your busy lifestyle, and performed within familiar surroundings, promoting independence and a better quality of life.
- ✓ **Cost-effectiveness.** Home infusions could potentially lower your copays, and make it easier for you to stick to your infusion schedule, which can lead to better treatment outcomes and lower overall health costs.

Our preferred provider for home infusion is Coram Specialty Infusion Services. Visit www.coramhc.com. Learn how they can help you manage your infusions by:

- Coordinating your care with doctors, nurses and Health Net.
- Helping with changes in your services, supplies, and benefits.
- Providing alerts and tracking numbers to help you stay on your medication schedule
- In addition, Coram can coordinate with CVS Specialty, Inc to have this injection delivered to the doctor's office for administration³

Note: Home infusion therapy is part of your home health care benefit.

Use of this program depends on whether Health Net or your assigned medical group is responsible for such arrangement. Call the number on your ID card for more information.

(continued)

Medications delivered intravenously in the home

Disorder	Product
