 **Check** with your county public health department

 You may be able to access transportation. **Check with your health plan, or go to 211.org for United Way transportation services.**

Can I get COVID-19 from the vaccine?

No. The COVID-19 vaccines do not contain the coronavirus or any part of the virus. You cannot get COVID-19 from the vaccines.^{1,2}

How were the COVID-19 vaccines made so fast, and why was the government involved?

The COVID-19 vaccines were made using the same standards as for other approved medications and vaccines.^{1,2} Because COVID-19 has spread so fast, the government gave extra money to speed up the process to help produce and distribute the vaccines across the country.

Are the COVID-19 vaccines safe?

Safety is a top priority during all vaccine clinical trials. This is also true for the COVID-19 vaccines, which are approved for emergency-use by the FDA. To see how the vaccines offer protection, experts made sure to recruit adults from many different backgrounds, races, ethnicities, and geographic areas.³ People with different health conditions were also part of the trials.³

Are all available COVID-19 vaccines effective?

All COVID-19 vaccines approved by the FDA for emergency-use are highly effective. They significantly prevent hospitalization and death due to COVID-19.^{1,2}

Should I get the vaccine if I have allergies or other medical conditions?

If you have any concerns about getting the COVID-19 vaccine, check with your doctor first. Your doctor can explain more and help you make a vaccination plan.^{1,2}

What are the side effects?

Side effects from the COVID-19 vaccines are normal and usually mild. They may happen after you get the vaccine and go away within a day or two.^{1,2}

Common side effects can include:^{1,2}

Pain, redness, or swelling where you got the shot

Fatigue

Muscle and/or joint pain

Chills

Fever

Headache

Nausea
