

2025 Guide to Covered Drug Alternatives

Wellcare By Health Net (Health Net*) covers more than 40,000 drugs

The Plan strives to cover the most common drugs across all conditions. Below are some common drugs not covered by the Plan, along with alternative drugs that are covered. If your patient is currently on a drug that is not covered, please see if the formulary alternatives listed below would work for your patient.

You can also check our Plan's formulary (drug list) for a comprehensive listing of all drugs that are covered and any formulary restrictions that may apply.

- **Bold text** = Brand name drug
- Unbolded text = Generic drug
- ** = Interchangeable alternative (same active ingredient)
- PA = Prior authorization
- QL = Quantity limit

Generics and authorized generics listed in the table below with the double asterisk (**) have the same active ingredients as the drug not covered on the formulary. If your patient has an active prescription for a drug not covered, they will still be able to access the listed double-asterisked drug without needing a new prescription.

Drug(s) not covered on the formulary	Drug(s) covered on the <i>formulary</i>	Formulary restrictions
NovoLog[®]	Insulin Aspart**	None
Fiasp[®], Humalog[®] , Insulin Lispro	Insulin Aspart	None
