Overview

Press Ganey (PG), a National Committee for Quality Assurance (NCQA) certified HEDIS® Survey Vendor, was selected by Health Net to conduct its MY 2025 CAHPS® 5.1H Medicaid Child Survey.

Survey Objective

The overall objective of the CAHPS® study is to capture accurate and complete information about consumer-reported experiences with health care. Specifically, the survey aims to measure how well plans are meeting their members' expectations and goals; to determine which areas of service have the greatest effect on members' overall satisfaction; and to identify areas of opportunity for improvement, which can aid plans in increasing the quality of provided care.

NCQA Updates

- NCQA made no significant changes to the survey or program this year.

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).
CAHPS® is a registered trademark of the Agency for Healthcare Research and Quality (AHRQ).

Methodology

QUALIFIED RESPONDENTS

- Included beneficiaries who were...
- Parents of those 17 years and younger (as of December 31st of the measurement year)
 - Continuously enrolled in the plan for at least five of the last six months of the measurement year

RESPONSE RATE CALCULATION

Spanish	13	18	30	30	0	0	61
Total	30	35	55	48	0	7	120

Total Number of Undeliverables: 159

Note: Respondents were given the option of completing the survey in Spanish. In place of the English survey, a Spanish survey was mailed to members who were identified by the plan as Spanish-speaking. A telephone number was also provided on the survey cover letter for all members to call if they would like to complete the survey in Spanish.

Executive Summary

Overview of Terms

Summary Rates (SRS) are defined by NCQA in its HEDIS MY 2025 CAHPS® 5.1H guidelines and generally represent the most favorable response percentages.

Percentile Rankings Your plan's approximate percentile rankings in relation to the Quality Compass® All Plans benchmark were calculated by Press Ganey using information derived from the NCQA 1-100 Benchmark.

PG Benchmark Information The source for data contained within the PG Book of Business is all submitting plans that contracted with PG for MY 2025. Submission occurred on May 26th, 2026.

NCQA Benchmark Information The source for data contained in this publication is Quality Compass® All Plans 2025. It is used with the permission of NCQA. Any analysis, interpretation, or conclusion based on these data is solely that of the authors, and NCQA specifically disclaims responsibility for any such analysis, interpretation, or conclusion. Quality Compass® is a registered trademark of NCQA.

Small Denominator Threshold NCQA will assign a measure result of NA to overall ratings or composites with a denominator (i.e., the average number of responses across all questions used to calculate the composite) less than 100.

Technical Notes Please refer to the Technical Notes for more information.

Significance Testing All significance testing is performed at the 95% confidence level using a t-test for mean scores and z-test for percentages. The following notation is used to highlight significant differences.

- Comparisons to previous year (↑/↓)
- Comparisons over 2 years (⌘/⌘)
- Comparisons to benchmarks (▲/▼)

Rating of Health Care	9 or 10	68^	60.2%	73.4%	--	NA

EXPLANATION

NCQA calculates health plan ratings (HPR) by evaluating plans in three categories: consumer satisfaction, clinical quality (includes prevention and treatment) and NCQA Accreditation Standards score.

The overall NCQA star rating is the weighted average of an organization's HEDIS and CAHPS measure ratings, plus Accreditation bonus points (if the organization has NCQA Accreditation), rounded to the nearest half point.

The CAHPS measures are classified based on their national percentile (10th, 33rd, 67th and 90th) into scores ranging from 1 to 5 (in increments of 0.5), where 5 is the highest score and 1 is the lowest.

Results are summarized in the table to the left. **Percentiles and ratings are estimated by PG** based on the 2025 NCQA data and benchmarks.

Rating = 1	Rating = 2	Rating = 3	Rating = 4	Rating = 5
<10 th Percentile	10 th – 32 nd Percentile	33 rd – 66 th Percentile	67 th – 89 th Percentile	≥90 th Percentile

Notes:

- NCQA will assign a measure result of NA to overall ratings or composites with a denominator (i.e., the average number of responses across all questions used to calculate the composite) less than 100.
- Medicaid plans have the option to be scored on either Adult CAHPS or Child CAHPS data.

***HPR scores** are **truncated** to three digits (XX.X%) according to the NCQA calculation protocol for Health Plan Ratings. Please note that scores on this slide may differ slightly compared to scores found throughout the rest of the report.

Key Driver Analysis

POWeR Chart

POWeR™ CHART CLASSIFICATION MATRIX

Overview. The SatisAction™ key driver statistical model is a powerful, proprietary statistical methodology used to identify the key drivers of the rating of the health plan and provide actionable direction for satisfaction improvement programs. This methodology is the result of a number of years of development and testing using health care satisfaction data.

The model provides the following:

- Identification of the elements that are important in driving of the rating of the health plan.
- Measurement of the relative importance of each of these elements.
- Measurement of how well members think the plan performed on those important elements.
- Presentation of the importance/performance results in a matrix that provides clear direction for member satisfaction improvement efforts by the plan.
