Follow-Up After Emergency Department Visit for People with Multiple High-Risk Chronic Conditions (FMC)

Learn how to improve your FMC HEDIS[1] rates by using this tip sheet to review key details about the measure, exclusions, billing codes, documentation required and best practices.

Measure	This measure assesses the percentage of emergency department (ED) visits between January 1 and December 24 of the measurement year for members ages 18 and older who have multiple high-risk chronic conditions and who had a follow-up service within seven days of the ED visit (eight days total).
Eligible members	Members ages 18 or older on the date of the ED visit and: • Have two or more chronic conditions diagnosed prior to the visit and • Visited the ED on or between January 1 and December 24 of the measurement year. Note: Members may have more than one ED visit. Identify all ED visits between January 1 and December 24 of the measurement year. If a member has more than one ED visit in an eight-day period, include only the first eligible ED visit. Visit type **does not need** to be the same for the two visits, but the visits **must** be for the same eligible chronic condition.
Eligible high-risk chronic condition diagnosis	Members who had any of the following eligible chronic condition diagnoses prior to the ED visit: • Alzheimer's disease or related disorders. • Atrial fibrillation. • Chronic kidney disease. • Chronic obstructive pulmonary disease (COPD), asthma or unspecified bronchitis. • Depression. • Heart failure. • Myocardial infarction – acute. • Stroke or transient ischemic attack.
Exclusions	• Admitted to an acute or nonacute inpatient facility on or within seven days after the ED visit, regardless of the principal diagnosis for admission. • Members in hospice care or using hospice services anytime during the measurement year. • Deceased members during the measurement year.

24-854 (8/24)

Best practices	- Contact members as soon as ED discharge notification is received and schedule follow-up visit. - Discuss the discharge summary; verify understanding of instructions, and verify if all new prescriptions were filled. - Complete a thorough medication reconciliation with the members and/or caregiver. - Conduct outreach to members after their ED visit to schedule a post-ED follow-up visit within 2-5 days after discharge. The follow-up visit can be the same day as the ED visit. - Connect with Cozeva® to receive timely admission, discharge, transfer (ADT) data from Wellcare By Health Net (Health Net*) and create provider alerts and tracking for follow up. - Educate members on the importance of regular follow up with their primary health care provider to regularly manage their chronic condition. - Submit claims timely and include the appropriate codes for diagnoses, health conditions and the services provided. - Keep open appointments so patients with an ED visit can be seen within seven days of their discharge. In addition to an office visit, follow up could be provided via a telehealth, telephone, e-visit or virtual visit. - Encourage patients to call primary care physician's (PCP's) office/after-hours line when condition changes (weight gain, medication changes, high/low blood sugar readings).
Information required for compliance	The medical record should contain the dates of service for follow-up visit and all aspects of the visit, including physical exam findings, thorough and diagnosis-appropriate mental health assessment, medication list, medication side effects, compliance with documentation and prescribed treatment, questions/concerns the member or caregiver may have, etc. The following visit types **meet** criteria: - Outpatient, phone, telehealth, e-visit, virtual check-in. - Transitional care management services, case management visit, complex care management service. - Outpatient or telehealth behavioral health visit. - Intensive outpatient or partial hospitalization. - Community mental health center visit. - A substance use disorder service or substance abuse counseling and surveillance. - Electroconvulsive therapy.

Codes

FMC common codes

Use the appropriate service codes when billing.

Service type	Codes
BH Outpatient	CPT: 98960, 98961, 98962,99078, 90202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99242, 99243, 99244, 99245, 99341, 99342, 99344, 99345, 99347, 99348, 99349, 99350, 99381, 99382, 99383, 99384, 99385, 99386, 99387, 99391, 99392, 99393, 99394, 99395, 99396, 99397, 99401, 99402, 99403, 99404, 99411, 99412, 99483, 99492, 99493, 99494, 99510 HCPCS: G0155, G0176, G0177, G0409, G0463, G0512, H0002, H0004, H0031, H0034, H0036, H0037, H0039, H0040, H2000, H2010, H2011, H2013-H2020, T1015
