

Get Smart

An inside look at next-generation health coverage

Pam White
Health Net

Health Net SmartCare puts together all the pieces employers and employees value:

1 360° view of health. Beyond medical, every SmartCare plan includes acupuncture, chiropractic and prescription drug coverage. Of course, preventive care is \$0 for members.

2 Trusted community-based network. Health Net SmartCare is built on a tailored network of trusted, high-quality provider groups and hospitals, and features conveniences like CVS MinuteClinics for greater access and value.

Today, the SmartCare plans and network are available in parts of Los Angeles, San Bernardino, San Diego and Orange counties. Built for flexibility, SmartCare will continue to expand over time – both geographically and with prominent provider groups.

3 Sustainable affordability. Simpler plan choices with a mix of copay and coinsurance designs to meet budgets and exceed expectations. For even more flexibility, employers can offer SmartCare plans alongside other Health Net plans.

4 Well-being as a way of life. Through a mix of wellness resources, financial incentives and high-tech conveniences, SmartCare promotes patient engagement, which in turn translates to improved outcomes and productivity.

5 Interactive convenience. SmartCare online brings value right to your fingertips. Side-by-side plan comparisons and interactive coverage maps are just two of the resources we've created to make it easy to do more business. Explore it all at www.healthnet.com/smartcare.
