How to Enroll	3
Primary Care Physicians by County	9
Hospitals by County	27
Specialist Physicians by County	29
Ancillary Providers by County	45
Primary Care Physician Index	49

CHOOSING YOUR PRIMARY CARE PHYSICIAN

To make it easy for you to enroll, we have arranged the information in this directory in several different ways.

BASED ON THE AVAILABILITY OF YOUR CURRENT DOCTOR

To see if your doctor is available for selection as a Health Net primary care physician, turn to the primary care physician index. This index lists, alphabetically by last name, available primary care physicians and the pages to reference for further enrollment information.

BASED ON WHERE THE DOCTOR'S OFFICE IS LOCATED

To choose a doctor based on convenience to your home or work location, turn to the listing of primary care physicians by county. In this listing, the name of each primary care physician is grouped in alphabetical order by the city in which his or her offices are located.

BASED ON THE DOCTOR'S HOSPITAL AFFILIATION

If you are interested in which hospitals are affiliated with Health Net, please refer to the hospital index. You should consult with your primary care physician to determine whether he or she has admitting privileges at the hospital you prefer. Your physician will coordinate all your care directly.

BASED ON AFFILIATION WITH A PARTICULAR SPECIALIST

If you are interested in which specialists are affiliated with Health Net, please refer to the specialist index. Your primary care physician is your primary medical provider. Your physician will coordinate all your care by either treating you directly or authorizing care by another doctor or other health care provider, as needed.

As a member of Health Net, you must obtain a referral from your primary care physician to see a specialist. Remember, women may self-refer to a network OB/GYN at any time without authorization from their primary care physician.

Note: Updates are added continuously to ensure that the information in this directory is current. We're constantly adding to and updating our physician network, and we make every effort to assure this directory's accuracy. However, we cannot guarantee this edition is correct in all cases. Please confirm a physician's participation prior to receiving services. (If the doctor you're currently seeing is listed in our directory as not accepting new patients, don't worry – you can continue to see your current physician as a member of Health Net.)

You can also access up-to-date directory listings on the Internet at www.healthnet.com.

HOW TO COMPLETE YOUR ENROLLMENT FORM

After you've chosen a primary care physician, you're ready to complete your Health Net enrollment form. Just follow the steps below:

1. Use one of the methods mentioned on the previous page to choose a primary care physician.
2. Verify the physician's office location. Confirm that the location is convenient for you. To ensure that you have reasonable access to care, we ask that you reside or work within 30 miles of your chosen doctor's office.
3. On your enrollment form, write the primary care physician enrollment code of the physician you've chosen. You can choose a different primary care physician for each member of your family.

SOME FREQUENTLY ASKED QUESTIONS

Because you may come across some terms that are unfamiliar to you, we've included some commonly asked questions relating to these terms.

HOW IS A REFERRAL SPECIALIST DIFFERENT FROM A PRIMARY CARE PHYSICIAN?

Your primary care physician is your main medical provider. He or she is the doctor who is responsible for coordinating all of your medical care and authorizing all specialized treatment or hospitalization. As a member of Health Net, you must obtain a referral from your primary care physician to see a specialist. Women may self-refer to a network OB/GYN at any time without authorization from their primary care physician. Referral specialists are not available for selection as your primary care physician.

WHAT'S THE DIFFERENCE BETWEEN EMERGENCY CARE AND URGENT CARE?

You need emergency care for a sudden, serious and unexpected illness, injury or condition, including severe pain, that a reasonable person with an average knowledge of health and medicine would believe requires immediate medical attention.

Urgent care, on the other hand, is care provided for medical conditions that require treatment within several days but are not considered immediately life-threatening. These may include sprains and fractures, a sudden high fever or pneumonia, or a flare-up of a chronic condition such as asthma.

Health Net covers care received from any licensed provider or treatment center anywhere in the world for any emergency situation. Situations requiring urgent care are covered when received from or authorized by the member's primary care physician. All non-emergency care must be provided by or through the member's primary care physician.

HOW CAN I GET A LIST OF SUB-ACUTE CARE FACILITIES?

Sub-acute facilities provide sub-acute care for the special nursing needs of patients who do not need acute care and are too ill to be cared for by most skilled nursing facilities (SNFs). These include transitional settings following acute hospitalization (such as those discharged from hospitals but not fully recovered).

To request a Sub-Acute Care Facility list, call the Health Net Customer Contact Center at the number listed on your Health Net Life ID card.

SHOULD I CHOOSE A DOCTOR WHO IS CLOSE TO HOME OR CLOSE TO WORK?

That decision is entirely up to you. But your choice will probably depend on when you think you'll access care most often. If you prefer to make weekday appointments, choosing a doctor who's convenient to your work location can make sense. However, for those times when you wake up feeling ill, you'll probably appreciate having a doctor whose office is closer to home. Our general advice – to ensure that you have the greatest access to the care you need – is that you choose a doctor whose office is located within 30 miles of either your work or your home.

WHEN CAN I CHANGE TO A NEW DOCTOR?

You may choose a new primary care physician on a monthly basis. If you choose a new doctor before the 15th of the month, you can begin seeing your new doctor anytime after the 1st of the next month. If you choose a new doctor after the 15th, you'll need to wait as long as six weeks before you can begin seeing your new doctor. For example, if you call the Customer Contact Center on August 12, you can begin seeing your primary care physician anytime after September 1. If you call on August 18, you'll be able to see your new primary care physician on October 1.

HOW CAN I OBTAIN INFORMATION ON DOCTORS WHO ARE IN THE HEALTH NET NETWORK?

When doctors agree to provide care to Health Net members, they give us some key information about their qualifications. To help you make informed decisions about your care, we make much of this information available in our directories, on our website, or by calling the Customer Contact Center. You can learn whether your doctor is board certified, where your doctor attended medical school, where your doctor performed his or her residency, your doctor's address and phone number, the hospital(s) at which your doctor practices, and which languages (in addition to English) your doctor may speak.

Please note: Updates are added continuously to ensure that the information in this directory is current. While we cannot guarantee that this edition is correct in all cases, we have made every effort to assure its accuracy. Please confirm a physician's participation prior to receiving services.

HOW HEALTH NET WORKS

HOW TO RECEIVE CARE

Your primary care physician is responsible for performing or authorizing all your covered medical services, including hospitalizations. (Women may self-refer to a network OB/GYN at any time without authorization from their primary care physician.) Your primary care physician's office operates just like any other private practice doctor's office. When you need to see your doctor, just call for an appointment. It's that simple.

ABOUT YOUR HEALTH NET LIFE ID CARD

After you enroll in Health Net Life, you will receive a Health Net Life ID card. This ID card is your "passport" to all of your care as a Health Net Life member. It contains all the information that anyone needs to know about you as a member of Health Net Life, including your level of benefits and the number to call for authorization in an emergency. Because it is so important, it's a good idea to keep your Health Net Life ID card with you, wherever you go. If you lose your card, call the Customer Contact Center for a new one. If you ever change your primary care physician, we'll send you a new card in the mail.

HOSPITALIZATION

Your primary care physician may find it necessary to refer you to a hospital for further care, on either an inpatient or an outpatient basis. You will usually be hospitalized where your physician has admitting privileges. Please consult your primary care physician to determine where he or she has admitting privileges.

It is important to remember that your primary care physician must first be contacted for initial treatment and consultation before you receive any care or treatment through a hospital. Your primary care physician will be responsible for determining the most appropriate site and location for your additional care. Admission to and treatment rendered by any hospital listed in this directory must be authorized by your selected primary care physician.

BEHAVIORAL HEALTH PROVIDERS

Health Net has contracted exclusively with Managed Health Network (MHN) specializing in mental health and chemical dependency services.

Health Net members can directly contact Managed Health Network by referring to the telephone number listed on your Health Net Life ID card.

GLOSSARY OF TERMS

Authorization: If you need a special type of care, your primary care physician will refer you to a specialist. If your doctor's request for referral is approved, you will be given a form called an Authorization for Consultant's Services. This form lists the type of care or services that you need and the number of visits that you can schedule. Always check with your primary care physician to make sure all your visits to a specialist are covered by Health Net.

Primary care physician: The physician who is responsible for performing, prescribing, directing or authorizing all of your health care, including routine, referral and follow-up treatment. If you need a special type of care, your primary care physician will be responsible for referring you to an outside specialist.

Provider: This term applies primarily to any facility, physician or other health care professional contracted with Health Net to provide care to members on a preauthorized or contractual basis.

Referral: See authorization.

Referral specialist: Your primary care physician is responsible for administering your care, and he or she will authorize a referral to an appropriate specialist when necessary. You may not select a referral specialist physician as your primary care physician.

Urgent care: When conditions require treatment within several days but are not considered immediately life-threatening, they require urgent care. Examples of urgent medical conditions are sprains and fractures. If your primary care physician is not available to see you on a same-day basis, you will be referred to a facility where you can receive the care you need.

Primary Care Physicians by County

The following is a listing of Health Net Primary Care Physicians, grouped in alphabetical order by the county in which their offices are located. The listing shows each physician's enrollment code. When you complete the enrollment form to become a Health Net member, you will need to identify the Primary Care Physician of your choice by writing in this code.
